Testimonials

“ Excellent job on part of Zest Infotech. Our project was extremely complex using a client, server, and web java applet environment for online backup. Zest Infotech regularly provided their input concerning the initial R&D of the project to ensure a viable outcome at the end of the project. They also did thorough testing not only functional but also performance and scalability which made this software more robust ”

- Jason Korkin, SafeDataTech LLC

“ Zest Infotech is simply awesome! They have a great team that took full control of the entire development process. Our own programmers who helped provide some of the specs on the project were amazed at the quality and professionalism that Zest delivered. I highly recommend Zest Infotech, and I intend on using them in the near future! ”

- Rob Fitzpatrick, Adminpal LLC

“ Zest team quickly grasped the complex social networking domain and our ideas about the product. Everything looks fine. We will work with Zest again. ”

- Chase McMichael, Unbound Technologies
